MEMORANDUM FOR DISTRIBUTION

SUBJECT: Apple iOS 10 Security Technical Implementation Guide (STIG) Version 1

Reference: Department of Defense Instruction 8500.01, Cybersecurity, dated March 14, 2014

Department of Defense (DoD) Instruction 8500.01 directs that the Defense Information Systems Agency (DISA) “develops and maintains control correlation identifiers (CCIs), security requirements guides (SRGs), security technical implementation guides (STIGs), and mobile code risk categories and usage guides that implement and are consistent with DoD cybersecurity policies, standards, architectures, security controls, and validation procedures, with the support of the NSA/CSS, using input from stakeholders” and DoD Component heads “ensure that all DoD IT under their purview complies with applicable STIGs, security configuration guides, and SRGs.”

To position the DoD so it can readily support the future STIG requirement that all iOS devices be supervised, DISA recommends DoD procurement offices immediately institute a procurement process in which all iOS device procurements require that the device be enrolled in Apple's Device Enrollment Program (DEP) by the selling vendor. In addition, current iOS device inventory should be registered in DEP through the reseller the devices were purchased from, and any device not eligible for enrollment in DEP should be identified as soon as possible. Devices not able to be enrolled in DEP can still be supervised using the Apple Configurator tool.

In accordance with DoD Instruction 8500.01, the Apple iOS 10, Version 1 is released for immediate use. The document is available on <http://iase.disa.mil>.

Point of contact for this action is DISA STIG Support Desk,
email: Disa.stig_spt@mail.mil.
