

UNCLASSIFIED

SRG and STIG Readme

Version 1, Release 1

06 August 2014

Developed by DISA for the DoD

UNCLASSIFIED

This Readme file describes the types of files that may be contained within this package and their usage. The ones listed are those commonly found in packages. Not all possible file types are listed.

File	Description
Overview.pdf or Addendum.pdf	This document contains background information and other important information that could not be stored in the XCCDF document.
**Manual_SRG.zip or Manual_STIG.zip	These files contain manual SRG and STIG content. They may be opened with STIG Viewer or extracted to a folder for viewing in a web browser.
Supplemental.pdf	The Supplemental Procedures document contains additional information not included in the Overview or XCCDF document.
Configuration_Table.pdf	Configuration Table contains IT policy rules, profile settings, and other server configurations.
Revision_History.pdf	Revision History contains the history of the changes.

**The Manual_SRG or Manual_STIG ZIP file contains the following:

File	Description
Manual-xccdf.xml	This is an XCCDF XML document that contains the manual content of the SRG or STIG.
STIG_unclass.xsl or STIG_fouo.xsl	This is an XSLT stylesheet that is used for converting the XCCDF document into HTML for viewing in a web browser.
DoD-DISA-logos-as-JPEG.jpg	This is a JPEG image that contains the DoD and DISA logos that are displayed at the top of the document when viewed as HTML.
