STIG Viewer Change Log

Current, Version 2.6.1
****
==General==
-Updated DISA Logo.
-Corrected less than or greater than parsing issues.
-Updated Readme.

==STIG Explorer tab==
-Updated STIG import functions:
*STIG Viewer overwrite warning now specifies the respective file.
*STIG Viewer overwrite warning now has an 'Ok to All' option for mass imports.
*STIG Viewer warns when invalid files are not imported, in a single window.
*STIG Viewer no longer crashes when starting, due to having invalid files in the Local Data Cache. Invalid files are now, however, reported to the user.

==Checklist tab==
-Corrected "off by one" error in .csv export option that was causing certain columns to be shifted to the left by one.
-Corrected bug that was not allowing XCCDF results to be imported to a checklist when it was opened from file.
-Corrected error that would, on rare occasion, overwrite all open checklists with the first saved.

Version 2.6
****
DISCLAIMER: THIS VERSION OF DISA STIG VIEWER HAS BEEN COMPILED WITH JAVA 8 AND WILL NOT RUN ON EARLIER MAJOR VERSIONS OF THE JRE/JDK, E.G. JAVA 7.
==General==
-STIG Viewer now fully supports importing DISA XCCDF 1.2 STIGs.
-STIG Viewer now warns the user when an .xml or .zip file that does not contain a STIG is attempted to be imported.
-The STIG Import option now sees .xml and .zip files at the same time.
-Export and import options now recall the last visited directory on a per tab basis.
-Filters now highlight the corresponding found text.
-Corrected a bug in the filter where the Rule Title filter was functioning as the keyword filter.
-A preferences menu has been added for some simple graphics configurations such as font size and overall theme.
-Optional logging to output file has been implemented to aid in error debugging.
-STIG Viewer now keeps the most recent selected vulnerability better selected.
-Small GUI sizing priority update.
-Updated Readme.

==STIG Explorer tab==
-The profile selection dropdown menu has been restored and improved. See Readme for more information.

==Checklist tab==
-STIG Viewer now allows for multiple Checklist tabs to be opened at the same time.
-The Checklist STIGs List has been re-implemented in its entirety. It functions similar to the STIG Explorer tab STIGs List.
-A new feature has been added that will import checklist data from old STIGs into new Checklists created with the new STIG version.
-Under the Checklist tab in the Preferences menu, there are now selection menus provided to choose colors for vulnerability statuses.
-Added in improved keyboard shortcuts.
